PROFESSIONAL EXPERIENCE

DOORDASH

Delivery Driver- Lafayette Hill, PA 2021-2024

I worked with customers to ensure they were always satisfied with their orders.

I used my area knowledge to ensure all customers' orders were delivered quickly.

MYNETDIARY INC

Intern- Marlton, NJ 2020-2020, 2021-2021

I analyzed, documented, and reported data to the principal developer.

I compared application functions and features to those of other competing websites.

I Provided developers with vital information to further improve their products.

SOFTWARE PROJECTS

2D Platformer- Cat Kingdom

- Developed using C# and Unity Engine. Collaborated with group members with Unity Collaborate.
- A player can switch between characters with different abilities to navigate to the end of the level and defeat enemies.

3D Runner- Space Race

- Developed using C# and Unity Engine. Collaborated with group members with Github.
- A player must jump and dodge holes in the map by jumping to other walls.

Personal Website

- Developed using HTML, CSS, JavaScript, and React

File Cleaner

- Developed using Python.
 - Allows users to automatically clean files by organizing them into folders as a background application.
-
